

MK-5 UNIVERSAL MANUAL ENGRAVER

Please scan QR code
to watch video

The Mk-5 Universal Engraving Machine is probably the most versatile engraving machine in the world. It is capable of engraving both flat and bulky / cylindrical items, using the same vice assembly.

The MK-5 has undoubtedly the largest capacity in its field, capable of holding flatwork 430mm wide, any length, and cylindrical items up to 260mm diameter. It has no difficulty, therefore, in engraving large trophies, tankards, instrument panels, signs, jewellery, watches, decanters, wine glasses, etc.

The MK-5 comes complete with a motorised spindle, enabling it to engrave onto wood, plastic, metals and even glassware. Delicate items can be easily and accurately adjusted up/down, left/right, backwards/forwards, tilted and rotated.....its strength is its flexibility.

Engravers • shoe repairers • trophy retailers • jewellers • gift shops
• market traders • funeral directors • component manufacturers • engineers

P-1 ENGRAVING MACHINE

The P-1 is a non rotating machine, mainly used for engraving metals with a diamond tipped cutting tool. As a result, engraved letters, logos etc have a brilliant diamond cut with a deep lasting shine. Using the pantograph arm, the engraving letter can be adjusted to 21 different sizes. This facilitates engraving a wide range of character sizes using one original master type.
