

MPX-90

Engraves photos, text & logos using a diamond tip.

Imagine. **Roland**®

MPX90 is the latest model in the Roland Photo Marking Systems range of machines. The MPX90 uses a durable diamond tipped stylus to imprint a wide range of surfaces including harder metals such as iron, titanium, stainless steel, gold, silver and platinum. It can also imprint resins including acrylic.

The MPX90 features a work area of 80mm x 80mm and accepts items as thick as 40mm using the vice or flat table and 74mm direct on the machine bed.
